

FLEX-A-GARD High Strength Plastics

BAR SCREEN CONVERSION PARTS

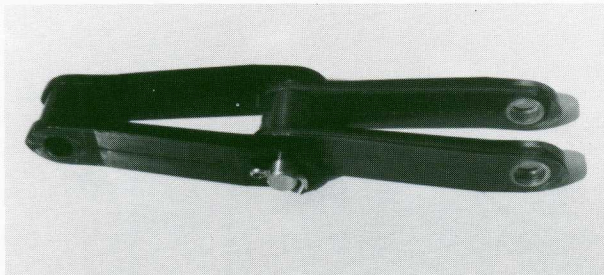

Flex-A-Gard produces a complete line of non-metallic parts for most any type of bar screen. These parts are made from the best available non-metallic materials. A conversion to a plastic system will reduce the weight of the chain and rake system by 60% or better. These parts have all been field proven in plants throughout the United States. Complete plastic systems are now possible even in the most severe screening applications.

RAKES

Steel Reinforced Polyurethane

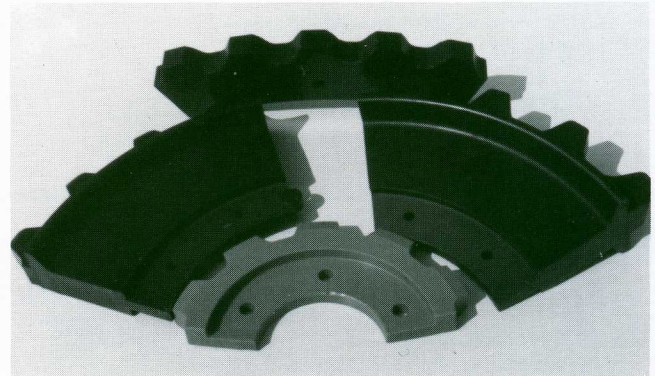

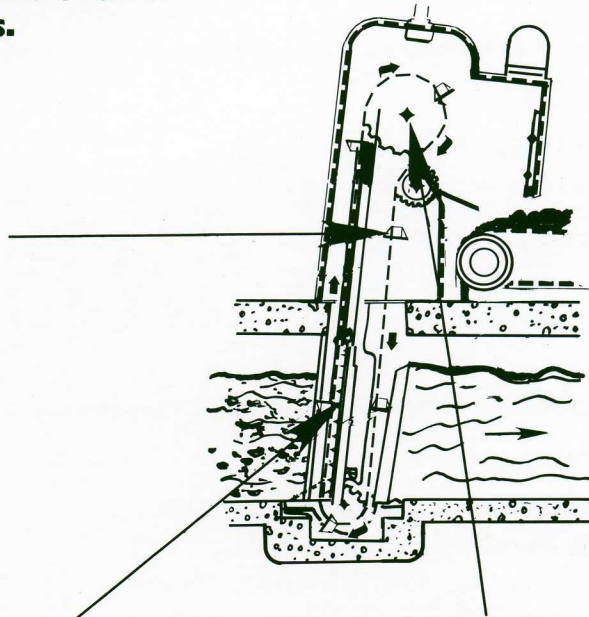

- LIGHTWEIGHT
- IMPACT RESISTANT
- SECTIONAL DESIGN
- CORROSION RESISTANT

720 PS CHAIN

Steel Reinforced Polyurethane

- SUPERIOR STRENGTH
- GRIT AND ABRASION RESISTANT
- LIGHTWEIGHT
- ADAPTABLE (CAN BE UTILIZED WITH STEEL CHAIN)

DRIVE AND IDLER SPROCKETS

Nylon, UHMW-PE, Combination Cast Iron Hub & Plastic Teeth

- REDUCES CHAIN WEAR
- EASILY CHANGED
- STRONG
- EXCELLENT WEAR
