

## WISESEAL - EXV INSTALLATION INSTRUCTIONS

- Remove old packing and clean out stuffing box.
- Install VISE BEARING into stuffing box. **DO NOT FORCE!** Sand O.D. for slip fit, if needed.
- When bottom bearing is fully seated, install lantern ring.
- Install packing rings, tamping each ring into place as you go. Stagger cuts around shaft with each ring.
- Tighten gland to compress packing rings, loosen gland and re-tighten gland nuts to finger tight.
- Turn water on and check leakage. *Three (3) or Four (4) drops per minute is ideal.*
- Adjust packing gland as necessary, turn two (2) flats on gland nuts per adjustment.

**Allow at least 15 minutes between adjustments.**
